

## **Project Design Phase-I**

### **Solution Architecture**

**Date-** 29 April 2025

**Project Name Project** – AI-Based Threat Intelligence Platform

**Maximum Marks** - 4 Marks

#### **Solution Architecture:**

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
